RESEARCH PROJECTS

MS THESIS Jan 2018 to Present	Networks Group, IIT Madras Guide : Prof. Balaraman Ravindran , Prof. Shankar Narasimhan Utilizing the Laplacian spectrum of hypergraphs represented using tensors for various learning tasks such as hypergraph partitioning, hyperedge prediction, and graph isomorphism.
M.TECH THESIS June 2015 to May 2016	Identification of Linear Dynamic Systems using Dynamic Iterative PCA Guide : Prof. Arun K. Tangirala , Prof. Shankar Narasimhan The work is concerned with identifying models from data that have errors in both outputs and inputs, popularly known as errors-in-variables (EIV) problem. We developed a novel and systematic approach to the identification of linear dynamic models for the EIV case in the principal component analysis (PCA) framework which provides unbiased model with minimal user intervention. The work is published and can be found here .
